

Intro to Digital Media Extra Credit Project (6 points maximum)

This **MUST** be completed in class on the Windows platform

Insert your Flash Drive with your Class Website Files

Create a Panorama with Photoshop (2 pt)

1. Review the video on [how to create a panorama](#), and use the shape tool to cut a shape into an image
2. Open up Photoshop and download [pano.1.jpg](#), [pano2.jpg](#), and [pano3.jpg](#)
3. Create a panorama, and perform the shape cutout effect based on the video above
4. Once you are finished creating the image, select Image> Image Size> and set the width to 950 pixels.
5. Select File> Save for Web> as **panorama.jpg** into your **images** folder of your website

If this is the only portion of the assignment you complete, upload the file to the dropbox and send me an email telling me you uploaded the Photoshop portion of the Extra Credit assignment: Subject Your Name, Section Number, Extra Credit

Create a new Premiere Slide Show (2 pts)

1. Launch Premiere and select File> Project> Use defaults settings and save to desktop
2. File> New Sequence> Settings Tab> Editing Mode> Custom, Video> Frame Size>500 Horizontal 150 vertical
3. Use 5 of your own images or download 5 digital media related images from the internet and save them
4. Open Photoshop and use the crop tool to crop them to 500 **pixels** x 150 **pixels**
5. Choose File> Save for Web> Again change Image Size W and H in the bottom right corner to 500 **pixels** x 150 **pixels**.
6. Click Save
7. Do this for all 5 images
8. Import the assets into Premiere
9. Complete the steps taken in the Slide Show assignment listed in the class reader and on the Class 11 Assignment tab, to Automate the Sequence. This includes default transitions between each image
10. Choose Export>Media> Settings> Format>Animated GIF
11. Export Settings> Video Tab> Set Width to 500 and Height to 150 (unlock **maintain aspect ratio** lock)
12. Click Export and save it to the **images** folder of your **website**

If this is the only portion of the assignment you complete, upload the file to the dropbox and send me an email telling me you uploaded the Premiere portion of the Extra Credit assignment: Subject Your Name, Section Number, Extra Credit

Create a Web Page with Dreamweaver (2 pts)

1. Launch Dreamweaver and Import your Site Definition for this class
2. Go to http://www.santarosa.edu/~jdiamond/intro_to_digital_media/extra_credit/
3. Right-Click on the ec.html and choose Save As to your site folder
4. Change the default color scheme by going to the CSS Designer panel and choosing ALL SOURCES
5. Change the Header
 - o Select the **header div**, go to the Properties section of the CSS Designer panel
 - o Find **background-color** and change the color to a dark blue
 - o Find **color** under **Text** and change the color to white
 - o Select **footer div**
 - o Set the background color #eec072, text color #660, text-align center
 - o Select the placeholder logo, go to Properties and point to one of **your logos** from earlier this semester
 - o Go to Split View and place your cursor between the close of the <header> and the open of the <a href>
 - o Select Insert> Image and choose your Animated GIF you created in the Premiere Slide Show above
 - o Go to Properties and choose Class>floatRight

6. Change the Footer
 - In the footer div type **Your Name Extra Credit Assignment**
 - Select Insert> Character> Copyright to add the copyright symbol after your name
 - Insert a space and place **the year** after the symbol
 - Save the html page as **extra_credit.html**
7. Change the Content Area
 - Select and delete **all the text** in the **article.content** div and **Insert** panorama.jpg
8. Save your file and upload it to your website
9. Copy the URL and send me an email with the link: Subject Your Name, Section Number, Extra Credit
